**Laser technology** is the revolutionary way of providing dental care in the pediatric population, an alternative to long and relatively uncomfortable or painful dental procedures. Waterlase technology uses a unique combination of laser energy and water to provide gentler and more precise treatment that conserves healthy tooth structure and minimizes pain and discomfort.

**Dr. Renuka Bijoor** is the **only pediatric dentist in Westchester** to offer the MD Turbo laser and its benefits to patients.

**Great for Children with Special Needs or Sensory Issues!**

**UNIQUE ADVANTAGES OF THIS LASER:**

- **Just light and water on top of the tooth** to remove decay – no sounds or vibrations of a drill!
- **NO** long waiting period for numbing effect.
- **NO** numb lip and/or tongue and cheek at the end of the procedure!
- **Conserves tooth structure!**
- **Reduces the number of cavity-forming bacteria!**

Call our office at [914-762-4151](tel:914-762-4151) to discuss your needs or schedule a complimentary consult regarding laser dentistry!

***IS YOUR NEWBORN HAVING TROUBLE LATCHING ON?***

***IS YOUR BABY HAVING TROUBLE WITH  
FEEDING/NURSING??***

***DOES YOUR TODDLER HAVE SPEECH DIFFICULTIES?***

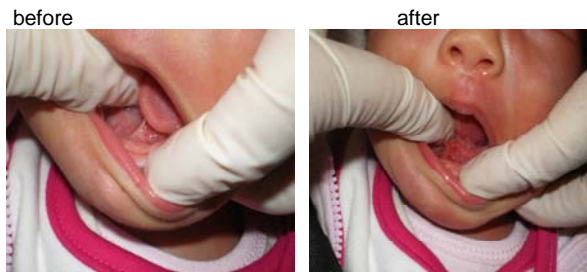

**WELCOME TO THE REVOLUTIONARY USE OF LASERS  
IN PEDIATRIC ORAL CARE!!!**

- Avoid shots, bleeding and stitches!
- **NO** Local or General Anesthesia
- **NO** Lengthy Hospital Stays!!

For soft-tissue procedures such as the release of tongue-ties in children, the procedure is so quick and painless that it is truly unbelievable! It eliminates excessive bleeding, the need for sutures and ensures faster healing! **Dr. Bijoor** has released tongue-ties in newborns **as young as a few days old to help with their difficulty in “latching on”!!**

A testimonial from a new mother: Mrs L, " I am really happy with the decision of getting the frenectomy and am so happy with using the laser with Dr Bijoor. My daughter didn't bleed and because she fell asleep during the procedure, it must have been pain-free and she didn't have to be "put under". We carried her to the car where I was able to nurse her with no difficulty. I would recommend **Dr. Bijoor's** laser frenectomy for any babies with a short frenulum!"

Mrs M, whose 2 year old daughter had speech difficulties because of a tongue-tie is incredulous! 'The procedure was so pain-free and easy!... the difference in her speech is remarkable!..."
